

José Luis Gutiérrez Álvarez

SOFTWARE ENGINEER

About me

Committed, organized and responsible professional, dedicated to continuous learning and effective teamwork. Skilled at communicating and collaborating with others to achieve project success.

Experience

Java Software Engineer

February 2024 - Present

FTE Jerez

At FTE Jerez, I handle analysis and Back-End development using Java with the Spring Framework in a Microservices Architecture, along with Front-End development in HTML5 and JavaScript. I manage the development team's Jira and document specific functionalities.

PHP Software Engineer

April 2023 - October 2023

Knowmad Mood - WiZink Bank

Working with WiZink Bank on the Lendrock project. My experience included the development of a Rest API in a Hexagonal Architecture in PHP with Symfony Framework using SOLID principles and technologies such as CQRS, Amazon Web Services, Docker, Redis, Git and BitBucket.
